

NEAS Benefits Your Supply Chain

Whether you are an individual customer, a large construction project or mining operation, a military contractor, or working on a special project under a local economic impact benefits agreement, NEAS offers real value to your supply chain. With NEAS as part of your bidding or project team, you will benefit and credit from the positive local impacts of NEAS and our sustainable development and commitment to environment and oceans. Arrange a meeting to learn how the NEAS team can benefit your projects and operations.

SUSTAINABLE DEVELOPMENT

- NEAS meets and exceeds all environmental protection obligations, including all relevant provisions under local and international laws and regulations
- NEAS commitment to the environment extends well beyond compliance at an operational level.
- NEAS is a leader in advocacy for enhanced marine infrastructure in remote arctic communities to improve safety, security and to mitigate and reduce environmental risk and enhance local response capacity.
- For NEAS, sustainable development bridges environmental compliance with social and economic development and enhancements in the quality of life for the communities we serve.

LOCAL IMPACTS

- NEAS maintains an industry-leading performance record while operating in extreme, unpredictable, and ecologically fragile conditions.
- At NEAS, our corporate social responsibility is rooted in our local shareholders and driven by our values and commitment to people, community and service.
- NEAS delivers proven local Inuit training and certification, employment, promotion, management, board and ownership opportunities, including Inuit direct investments and ownership in a growing fleet of modern Canadian flag vessels.
- NEAS works cooperatively with governments, local communities and customers to responsibly manage risks and deliver sustainable environmental solutions in Canada's Arctic, on land and at sea.
- NEAS supports local environmental initiatives of Arctic communities, including assistance in local remediation, recycling, removal and disposal efforts.

ENVIRONMENT & OCEANS

- While operating in extreme, unpredictable and ecologically fragile conditions, NEAS maintains an industry-leading performance record across the range of marine environment key performance indicators, including ballast water discharge, waste management, fuel, air emissions, and spills and leakage response.
- NEAS is at the forefront of environmental performance in Arctic shipping through a combination of routine internal and external audits and inspections, implementation of voluntary measures, and adherence to standards and best practices.
- NEAS' environmental performance is underpinned by three critical pillars: performance excellence among our captains, officers and crews; strategic investments in modern, reliable vessels and equipment; and, proactive, preventative maintenance.
- NEAS investments in modern equipment and pollution controls support advanced environmental risk management approach that combines the use of technology, communication protocols, training, planning and routing to avoid environmental risk.
- NEAS is a leading voice calling for government investment to enhance scientific data and information services to improve maps and charts, and more reliable and accurate local ice and weather data for safe arctic marine operations.
